FİRMA PROFİLİ

COMPANY PROFILE

Kıraç Metal Ltd. Şti., kablo taşıma sistemleri ve alçak gerilim panoları ürün gruplarında saygın ve global bir üretici olarak 2002 yılından bu yana faaliyet göstermektedir. Merkezi ve ana üretim tesisi Eskişehir'de olan firmanın; Bursa'da galvaniz tesisi ve Doha'da (Katar) bir üretim tesisi daha bulunmaktadır.

Şirketin geniş ürün gamı içerisinde kablo kanalları, kablo merdivenleri, trunking sistemleri, taşıma sistemleri, alçak gerilim panoları ve rack kabinetleri bulunmaktadır. Tüm ürünler sac, paslanmaz çelik ve alüminyum malzemeden üretilmektedir ve çeşitli kaplama seçenekleri mevcuttur. Ürün yelpazesindeki yenilikçi, sürdürülebilir gelişim ve hizmet mükemmeliyeti şirketin temel gücü olmaya devam edecektir.

Detaylı bilgi için
www.kiracmetal.com 'dan ziyaret edebilir veya satış personelimiz ile iletişime geçebilirsiniz.

Kıraç Metal Co. Ltd., established in 2002, has taken place as a respectable and global manufacturer in Cable Management and Low Voltage Enclosures Market. The company has its headquarters and primary production unit in Eskişehir (Turkey), galvanization plant in Bursa (Turkey) and another production unit in Doha (Qatar).

Kıraç Metal's wide range of products include: cable trays, cable ladders, trunkings, mounting systems, low voltage enclosures and IT cabinets. All products are available in steel, stainless steel and aluminium options and various finishes. The company's core power will always be the innovative growth in product range and sustainable service quality.

For Further Information
Visit our web page at www.kiracmetal.com or contact our sales team.

KALİTE QUALITY

Kıraç Metal üretim faaliyetlerini ISO 9001 kalite yönetim sistemine uygun şekilde sürdürmektedir. Alçak gerilim panolarımız, EN 62208 standardı ile uyumludur. Ayrıca tüm ürünlerimizde CE ve Rusya piyasası için GOST-R onayımız mevcuttur.

Aşağıdaki yönetmelikler alçak gerilim panoları için geçerlidir.

- LVD olarak bilinen alçak gerilim yönetmeliği 2006/97/EC
- CE işareti olarak bilinen markalama yönetmeliği 93/68/CEE
- RoHS olarak bilinen tehlikeli maddelerin kullanımını kısıtlama yönetmeliği 2011/65/CE.

Kıraç Metal has implemented quality management systems in accordance with ISO 9001 standards. Our low voltage enclosures in compliance with EN 62208 standards. Additionally, all of our products are CE listed and GOST-R approved.

The following directives apply to the low voltage enclosures:

- 2006/95/EC Directive known as Low Voltage Directive (LVD)
- 93/68/CEE Directive known as CE Marking
- 2011/65/CE Directive known as Restriction of Hazardous Substances (RoHS)

TS EN 62208
TS EN 61439-1-2

REFERANSLAR

REFERENCES

Kıraç Metal, Dünya'nın çeşitli ülkelerinde ürünlerini ve hizmetlerini sunmaktadır. Bu ülkelerden başlıcaları, Rusya, Slovakya, Fransa, Almanya, Katar, Kanada, Singapur, İtalya, Bulgaristan, Ürdün, Gürcistan, Azerbaycan, Kazakistan, Türkmenistan, Romanya, Lübnan, Mısır'dır.

Kıraç Metal olarak aşağıda adı geçen projelerde yer almış olmaktan büyük memnuniyet duymaktayız.

Kıraç Metal offers world-class products and services all over the world. We have been exporting to following countries: Russia, Slovakia, France, Germany, Qatar, Canada, Singapore, Italy, Bulgaria, Jordan, Georgia, Azerbaijan, Kazakhstan, Turkmenistan, Romania, Lebanon and Egypt.

As Kıraç Metal, we are pleased to have taken part in the following projects.

DİKİLİ TİP MODÜLER PANOLAR

FLOOR STANDING MODULAR ENCLOSURES

Dikili Tip Modüler Panolar maksimum işlevsellik ilkesiyle, elektrik ve otomasyon ekipmanlarının farklı alternatiflerle montajlanabileceği şekilde tasarlanmıştır. DKP çelikten üretilen bu panoların profesyonel kullanım için amaçlanan iki tipi vardır; Dikili Tip Dahili Modüler Pano ve Dikili Tip Harici Modüler Pano.

Panoların başlıca modülleri; modül takımı, kapı, montaj plakası, sabit kapaklar ve baza takımıdır. Modül takımı, 2.0 mm kalınlığındaki galvanizli sacdan imal edilir. Modül takımı, menteşelerin ve kapı destek profillerinin kolay montajını sağlayacak şekilde her iki tarafından (iç ve dış) yuvarlak (9.0 mm ile 4.5 mm) şekilde delinmiştir. Modül takımı, otomat rayı ayarlama komponentleri ve örtü plakalarının montajı için gereklidir. Yatay profiller, parçalı montaj plakalarının veya diğer elektrik ekipmanlarının farklı derinliklerde montajında kullanılır. Kapı destek profilleri mukavemeti artırmak ve elektrik ekipmanlarının montajlanmasını sağlamak amacıyla kapı iç kısmına monte edilmiştir. 4 farklı tipte kapı vardır. Tüm kapılar, iki taraflı kullanılabilir. Gizli kapı menteşeleri, kapının 130° açılmasını sağlar. İspanyolet kilit ile dört

noktadan kitleme güvenliği sağlar. Baza takımı; 4 adet köşe ve 4 adet kapaktan oluşan set halindedir.

Montaj plakası 2.0 mm galvanizli sacdan imal edilmiş olup bükümlerle mukavemeti arttırılmıştır. Montaj plakası doğrudan panonun arkasına veya yanlarına monte edilerek derinlik ayarını ve panonun tüm elektrik ekipmanları arasında bağlantıyı sağlar. Tespit elemanları ve montaj aksesuarları ile sabitlenir. Alt örtü plakası, 1.2 mm galvaniz sacdan imal edilir. Panonun üst kısmını kapatan tavan, fan modüllü ya da düz şekilde üretilebilir. Sabit kapaklar, panoların hem arka hem de yan kısımlarında kapama sacı olarak kullanılır. Panoların çoğu parçası elektrostatik toz boyama işlemine tabi tutulur (RAL 7032/ RAL 7035).

*Özel istek üzerine farklı renkler uygulanabilir.

The Floor Standing Modular Enclosures are designed with maximum functionality principle, allowing different alternatives for the installation of electrical and automation equipment. Produced from mild steel, there are two types of enclosures, offered for the professional applications: Floor Standing Standard Modular Enclosure and Floor Standing Outdoor Modular Enclosure.

The main parts of the enclosures are: frame, door, mounting plate, side panels and plinth. The frame is produced from 2.0 mm galvanized steel. The frame is perforated with round (9.0 mm with 4.5 mm) holes, which are placed on both sides (inside and outside), allowing easy installation of hinges and door support profiles. The frame is needed to attach DIN rail adjustment components and cover plates. Horizontal profiles are used to attach partial mounting plates or any other electrical components at various depths. Inside the door, the door mounting profiles are mounted to the frame in order to provide rigidity and allow electrical components to be installed. Doors are available in 4 different types. All doors are reversible. Doors concealed hinges

provided 130° opening angle. The espagnolette locking with 4 points movement provides security.

The mounting plate is made from 2.0 mm galvanized steel, strengthened by folds, fixed directly to the back of the enclosure or on the sides allowing depth adjustment and the connection between all enclosure devices. It is fitted together with brackets and mounting accessories. The bottom plate is produced from 1.2 mm galvanized steel. The top plate of the enclosure can be either with fan module or a straight cover. The side panels are used at the sides and the back of the enclosures as covers. Electrostatic Powder Coating (RAL 7032/ RAL 7035) is applied to most enclosure parts.

*Special colours applied upon request.

MONOBLOK PANOLAR

WALL-MOUNT ENCLOSURES

Monoblok Panolar, elektrik, elektronik ve enstrümantasyon dallarında pek çok farklı cihaz ve komponentler için, iç ve dış mekan uygulamalarında kullanılabilir. 5 farklı monoblok pano çeşidimiz bulunmaktadır: Standart, Duvar Tipi Harici, Sahra Tipi Harici, Sivaaltı Panolar ve Modüler Monoblok Panolar. Pano; gövde ve kapı olmak üzere 2 ana bölüme ayrılır. Gövde ve kapı genellikle 1.0 mm - 1.5 mm sacdan imal edilir. Kapı min. 2 adet menteşe ile güvenli bir şekilde monte edilir, sağa-sola (isteğe bağlı olarak) menteşenin yönü değiştirilebilir ve minimum 130° ile kapı açılabilir. Kapıda, sızdırmaz bölgenin içine yerleştirilmiş en az bir kilit bulunmaktadır. Dökme conta direkt kapı üzerine yerleştirilir. Pano duvara montaj askı elemanları ile sabitlenir, pano kapısı modüler yapıdadır ve yönü kolaylıkla değiştirilebilir.

Montaj plakası pano içi cihazların bağlantısını sağlar, 1.5 mm - 2.0 mm pre-galvanizli sacdan imal edilir, panonun arka duvarına veya derinliği ayarlamak için yan duvarlara monte edilir. Panonun bükümleri, izole bölümden su sızmasını engellemek için U-kanal şeklinde bükülmüştür.

Panonun tüm dış parçalarına, RAL 7032/ RAL 7035* elektrostatik toz boyama işlemi uygulanır. Ortam sıcaklık değerleri: -25 °C ila +40 °C arasındadır.

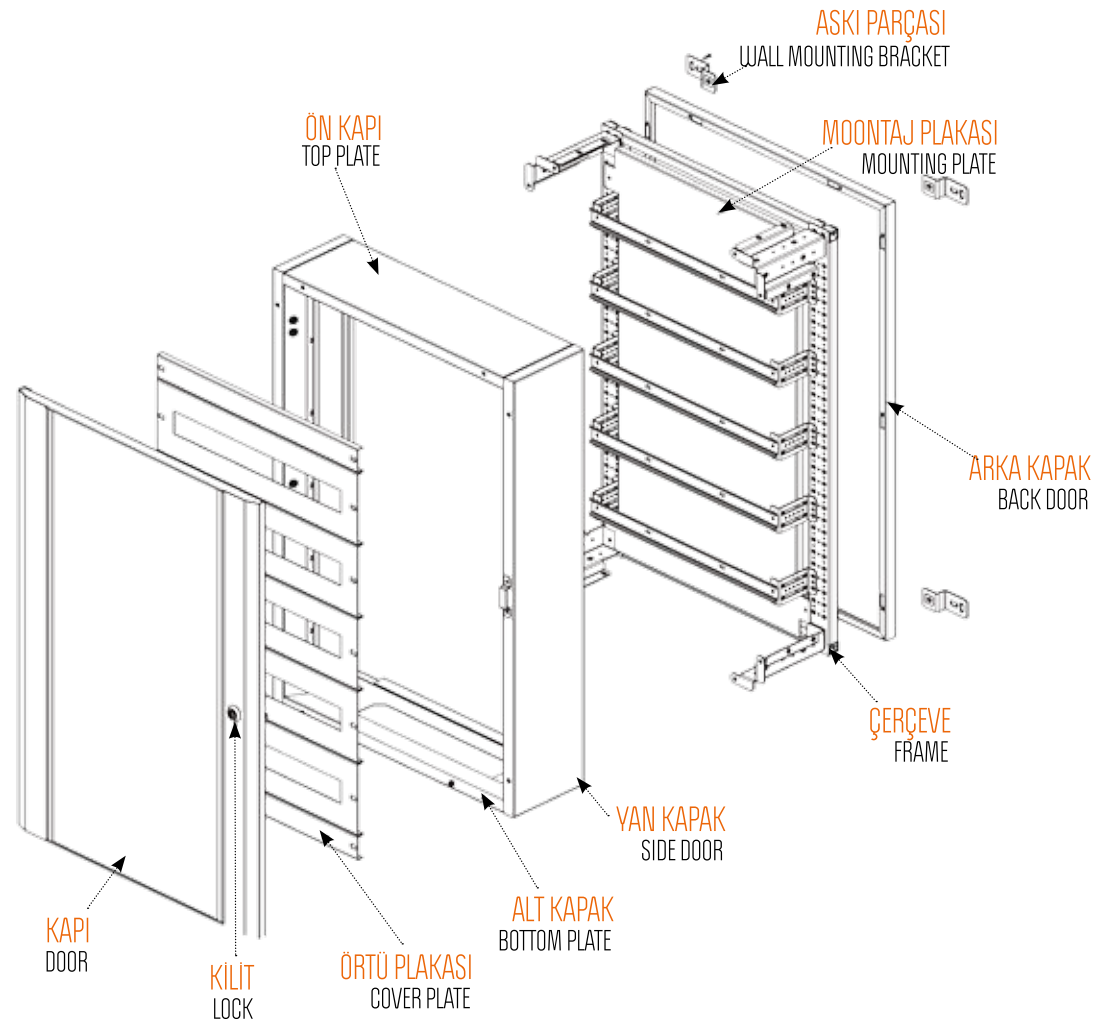

The Wall Mount Enclosures can be used in many different applications; house, electrical and electronic control, instrumentation and components in indoor or outdoor locations. Our range of wall mount enclosures consists of 5 different types: Standard, Outdoor Shed Roof, Outdoor Gable Roof, Flash Wall Mount and Modular Distribution Enclosure. We can distinguish two main parts in the enclosures: the body (base) and the door. The body and door are generally folded from 1.0 mm -1.5 mm steel plate. The door is secured by 2 pcs. hinges, mounted either to left or right side opening (upon request) and door opening angle is minimum 130°. The door is equipped with one lock, located out of the sealed area, gasket directly mounted on the door. The enclosures are secured to the wall using mounting

brackets, the hinges screwed onto the body of the enclosure, making it easier to remove and invert the door. The mounting plate is manufactured from pre-galvanized steel 1.5 mm -2.0 mm thickness, fixed directly to the back of the enclosure or on the sides allowing the in-depth setting and the connection between all enclosure's devices. The edges of the enclosures are folded in the shape of U-channel to avoid water stagnation on the seal.

Enclosure's all outer parts are pre-treated prior to electrostatic powder coating in RAL7032/RAL7035*. Ambient Temperature Limits: from -25 °C to +40 °C.

*Farklı renkler özel istek üzerine uygulanabilir.

*Special colours applied upon request.

RACK KABİNLER ve SERVER KABİNLER

RACK CABINETS and SERVER CABINETS

- Tamamı çelik konstrüksiyon
- Ergonomik tasarım
- Açılabilir ve kilitlenebilen yan ve arka kapaklar
- İstenilen seviyede ayarlanabilir rack montaj dikmeleri
- 400 kg taşıma kapasiteli
- Kolay montaj
- Tavan kısmına opsiyonel fan ünite montajlanabilir.
- Ön kapı 4mm temperli cam ve sac çerçeve ile desteklenmiştir.
- Alt ve üstten kablo girişleri
- Standart renkler Ral 9005, 7035 ve 7032'dir

- Completely steel construction
- Ergonomic design
- Openable and lockable side and rear covers
- Adjustable rack assembling erections in desired level
- 400 kg carrying capacity
- Easy assembling
- Optional fan unit can be installed to ceiling section.
- Cable inlets at the down and up sides
- Standard colors Ral 9005, 7035 and 7032.
